

Amendments to the Claims:

Cancel claims 1-8, without prejudice.

The following listing of claims will replace all prior versions and listings of claims in the application:

1.-8. (canceled)

9. (new) An adhesive system comprising:

a structural component to be mounted to a base structure, the structural component having a first bonding location and a second bonding location;

a primary bonding applied to the first bonding location of the structural component to bond the structural component to the base structure, the primary bonding comprising an adhesive of a strength sufficient to securely bond the structural component to the base structure; and

a secondary bonding applied to the second bonding location of the structural component to bond the structural component to the base structure, the secondary bonding comprising an elastically stretchable adhesive.

10. (new) The adhesive system of claim 9, further comprising a mounting profile connected to the structural component and the base structure.

11. (new) The adhesive system of claim 10, further comprising a carriage positioned between the mounting profile and the structural component, the carriage connecting the structural component to the mounting profile.

12. (new) The adhesive system of claim 11, further comprising an application adapter positioned between the carriage and the structural component, the application adapter being supported by the carriage and having a first mating surface for the primary bonding.

13. (new) The adhesive system of claim 12, wherein the carriage has a second mating surface for the secondary bonding.

14. (new) The adhesive system of claim 11, wherein the carriage comprises a roller assembly and a base body, the adhesive system further comprising a reception attached to the base body, and an application adapter attached to the reception and having a first mating surface for the primary bonding.

15. (new) The adhesive system of claim 14, wherein the base body has a second mating surface for the secondary bonding.

16. (new) The adhesive system of claim 9, wherein the secondary bonding has two bonding areas which enclose the primary bonding.

17. (new) The adhesive system of claim 9, wherein the structural component comprises a glass panel.
